EDUCATION

B.Sc. in Software Engineering

GPA: 82

Braude, Karmiel

Expected Graduation: 2026

SKILLS

Languages: Python | Java | C | C++ | JavaScript

AI & Machine Learning: Computer Vision | Edge AI | Reinforcement Learning

Embedded : ESP32 | Arduino | NVIDIA Jetson

Frameworks: React | Node.js | Flask | Tailwind

Tools: Linux | Git | Docker | MySQL | MongoDB

LANGUAGES

- English (Professional)
- Hebrew (Fluent)
- Russian (Fluent)

PROFILE SUMMARY

Software engineering student specializing in edge AI and embedded systems, with hands-on experience in full-stack development and teaching programming at the national Magshimim cyber education program. Seeking a backend or embedded software role where I can apply real-time systems thinking and a strong foundation across the full stack.

EXPERIENCE

Cyber Education Instructor & Mentor

Magshimim - National Cyber Education Program

May 2025 – Present

- Teaching C programming to **25+ high school students**
- Mentoring students from underrepresented communities for IDF technology units

MY PROJECTS

AI Driver Fatigue Detection System | [GIT](#) | in process

Python, OpenCV, MediaPipe, NVIDIA Jetson

- Architecting agentic AI driver monitoring system combining computer vision with LLM-based temporal reasoning for context-aware fatigue detection
- Deployed on portable ESP32-CAM hardware enabling fully offline, low-latency scene descriptions for real-world assistive use

GoNature - Park Management System | [GIT](#)

Java, JavaFX, MySQL

- Engineered a distributed multi-user park reservation platform with real-time capacity control, dynamic pricing engine, and role-based access for multiple user types
- Implemented full booking lifecycle including automated reminders, waitlist management, and analytics dashboards for park managers

EchoVision | [GIT](#)

C++, Python, Flask, GPT-4o, ESP32-CAM

- IoT assistive device providing real-time audio scene descriptions for visually impaired users
- Integrated GPT-4o Vision API with ESP32-CAM hardware via Flask backend

Interactive Quiz Platform | [GIT](#) | [LiveDemo](#)

ReactJS, Tailwind CSS, NodeJS, MongoDB

- Built full-stack quiz platform with automatic quiz generation via external API and custom quiz creation

Crypto Fraud Detection | [GIT](#)

Java

- Bitcoin address fraud detection system integrating external APIs to analyze suspicious wallets
